

Email Exchange - Institute of Historic Building Conservation

Hi Lydia

Please just circulate it 'free of charge' at present. I have just had our project bank account set up and now I need to get people fundraising! We are that early in the project!

Thank you for your kind help in this!

Bob

Thanks for that information. Would you like the tender to go on our jobs listing (cost £371 plus VAT) as well as being circulated to the HESPR contacts which is free of charge? The jobs listing will give you much greater coverage as it goes to around 22,000 via our networks.

Kind regards

Lydia Porter

Hi Lydia

Thank you for your informative response. Attached is information for a tender. Perhaps you could read it through to make sure it has suitable/accepted information prior to sending to your service providers list?

I'm happy to change wording if you so advise!

Thanks

Bob Cox

Thank you for your email. Is it a paid role with the Church you are looking to advertise or a tender? If it's a paid role the basic cost for an advert containing one vacancy is £371 plus VAT for a charitable organisation, although there are discounts available depending on what skills and qualifications are mentioned in the advert, see the website for more details. http://ihbconline.co.uk/jobsetc/?page_id=23. We recommend that you look at the adverts that are currently live on the site to get an idea of what information can be included before finalising your text - <https://ihbconline.co.uk/jobsetc/> and read the terms and condition - Terms & Conditions etc

If it's a tender, then we can circulate it to our service providers list.

Thanks.

Kind regards

Hi

We are a Grade 1 listed building near Wisbech in Cambridgeshire. Our church is just within Norfolk. Our last Quinquennial Inspection (2023) showed that an estimated spend of more than £1m is required to professionally discharge those fabric issues identified.

Our PCC is seeking an experienced lead consultant (conservation accredited architect or surveyor) to work with them to prepare up to RIBA stage 4 [the renovation works]: To undertake a new quinquennial inspection report using the Diocese of Ely/national pro-forma and to include estimated cost of repairs or using the 2023 Quinquennial Inspection. Then prepare a schedule of necessary repair works to include the provision of a feasibility level study.

I would like to advertise this opportunity through your webpage/newsletter etc. could you advise if this is possible and how to proceed?

Thanks

Best Regards

Bob Cox
